PURPOSE

"To promote the objectives of the Christian Ministry of Healing in the care of patients and in the philosophy and character of physicians, nurses, and those who care for the sick. To add to the therapy of patients physically, psychologically, and spiritually those specific therapies necessary in the consideration of the soul and spirit."

"For with God nothing shall be impossible."
Luke 1:37

OBJECTIVES

To increase quality of care and consider sanctity of life.

To increase the knowledge of the treatment of the whole person.

To consider the drastic changes in the medical profession and determine solutions not only for the problems patients face but the problems physicians and nurses have before them because of these changes.

To consider Christian medical ethics.

This will be an opportunity for everyone interested to hear those who have been leaders in the healing and the whole person medical movement in the United States and Canada over the past thirty years. It is a most unusual opportunity to visit a lovely Canadian City at a beautiful time of year; an opportunity to pray together, to praise together, and to bring healing to those who need hope and the healing love of the Lord Jesus Christ through His people. In contrast to previous Canadian meetings in recent years this meeting will be open to everyone, not simply to physicians, and it will be an opportunity on the truly ecumenical level for everyone interested to draw close to the Lord Jesus Christ, to experience the power and the anointing of His love and His virtue.

Christian Medical Foundation in the U.S. and Canada is an organization of doctors and nurses who believe not only in the highest and best care of the patient in the psychosomatic point of view but also who believe that it is the physicians and nurses responsibility to consider the spiritual aspect of patient care. To ignore the patient's psyche is to treat the patient negatively from the psychological point of view. The same holds true if the physician and the nurse ignore the spiritual aspect of each patient whom he is privileged to care for. Most American and Canadian hospitals were developed by Christian people. This has been characteristic across the entire world indicating the fact that Christians believe that Jesus Christ instructed His believers to heal the sick, cleanse the lepers, to raise the dead and to care for "the least of these, my brethren." It is our belief that the eternal spiritual aspect of the patient is rarely considered in modern medicine and psychiatry. With the time of increasing ethical dilemmas facing medicine and nursing today it is our belief that no quality decisions can be made, which are beneficial to the patient, without a basic knowledge of logo-psychosomatic nature of the patient and his total care, from the whole person point of view. This has been the message of Christian Medical Foundation for thirty years, a message which now has world-wide impact, and a tremendous potential in the future for an increase and a renewed development of truly compassionate and empathic medical care.
